

# ORION

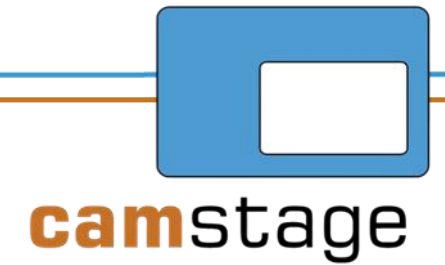

**WARNING:**

The patterns shown give an indication of colour. However a slight variation must be expected between dye batches, and monitors. All flame retardant materials should be kept free of dust as this may provide a fire source. Goods are offered subject to our Terms & Conditions of trading, a copy of which is available on request. We highly recommend viewing fabric samples before placing an order or manufacture.

duplex.

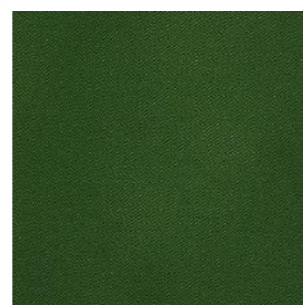

# ORION

Perfect for • Masking • Stage • Blackout

Orion is a 96% blackout fabric that is similar to Dimilan in construction, but with the colour woven on each side. Best suited from window drapes that will be seen from both sides. Commonly used in sports halls, conference centres and schools.
